

BACKEND ENGINEERING / ENTERPRISE .NET SYSTEMS

Alireza Nobakht

Backend Developer & .NET Engineer | ASP.NET Core | SQL Server | Enterprise Platforms

E alireza.nobakht2004@gmail.com M (+98) 910-977-7936 L Tehran, Iran

GH github.com/alirezanobakht2004 IN www.linkedin.com/in/alireza-nobakht-work W Portfolio

PROFESSIONAL PROFILE

Mid-Level ASP.NET Developer and .NET Backend Engineer with **2+ years** building production ASP.NET Core systems and enterprise operational platforms. Strong in secure REST APIs, **SQL Server** data layers, **Dapper**, **MediatR**, Redis, JWT/RBAC, Clean Architecture, Docker, and admin-facing backend systems. Developed the backend and database layer of a modular operations platform covering users, devices, manufacturing, commerce, inventory, payments, RMA, releases, NTRIP services, device events, and dashboard statistics.

01 TECHNICAL SKILLS

BACKEND & CODING

C#, .NET, ASP.NET Core, Web API, REST APIs, Dapper, Entity Framework Core, MediatR, LINQ, async/await, OOP, secure coding standards

ARCHITECTURE & SYSTEMS

Clean Architecture, layered architecture, CQRS, SOLID, dependency injection, modular backend design, Repository pattern, API design, domain workflows

DATA & PERFORMANCE

SQL Server, database design, schemas, stored procedures, indexes, query plans, query optimization, Redis caching, Dapper queries, reporting APIs

SECURITY & QUALITY

JWT, OAuth 2.0, RBAC, policy-based authorization, session validation, FluentValidation, Swagger/OpenAPI, auditing, xUnit, NUnit, Moq

DEVOPS & DELIVERY

Docker, Docker Compose, Redis, CI/CD pipelines, GitHub Actions, Azure DevOps, Git, Linux fundamentals, API versioning, deployment

ADMIN & CONNECTED SYSTEMS

Next.js and TypeScript admin UI integration, Kotlin/Android, STM32, C/C++, Qt, UART, SPI, GPS/IMU, device-event workflows

02 PROFESSIONAL EXPERIENCE

Backend Developer & Software Engineer

Hiromap (Hirongar Pars Company) | hiromap.com | Tehran, Iran

Feb 2024 - Present

- **Developed** backend and SQL Server layers for a modular enterprise operations platform covering users, identity verification, devices, manufacturing records, commerce, inventory, orders, payments, RMA/repair, releases, NTRIP services, device events, and dashboard statistics.
- **Built** ASP.NET Core REST APIs with layered architecture, MediatR, Dapper, SQL Server, Redis, JWT/RBAC, FluentValidation, Swagger/OpenAPI, and Docker.
- **Designed** repositories, operational queries, authorization policies, session validation, device ownership checks, and secure device-event access workflows.
- **Implemented** commerce, inventory, manufacturing-demand, RMA/repair, release, NTRIP, post-process, and dashboard-statistics modules for daily internal operations.
- **Integrated** APIs with a Next.js / TypeScript admin UI used by support, production, warehouse, management, and technical teams.
- **Built** C++/Qt and C# diagnostics tools plus Kotlin/Android and STM32 integrations for GPS/IMU processing, device communication, and resilient serial workflows.

Technical Instructor & Educational Consultant

Ghalamchi Educational Institute - Tehran, Iran

Aug 2022 - Jun 2023

- **Mentored** students throughout a **10-month engagement** in **3 areas**: programming fundamentals, algorithms, and software-development practices.
- **Designed** structured lessons, hands-on exercises, and peer-learning sessions across **3 formats** to reinforce programming concepts and collaboration.

SELECTED ENGINEERING WORK

Projects, Education & Development

Production backend platforms, SQL Server data layers, secure API workflows, admin dashboards, and event-driven .NET systems.

ASP.NET DEVELOPER
.NET BACKEND ENGINEER

Hiro Operations Management Platform

2024 - Present

Production enterprise backend and admin system for device, commerce, manufacturing, RMA, and operations workflows

ASP.NET Core · C# · SQL Server · Dapper · MediatR · Redis · Docker · JWT/RBAC · Next.js · TypeScript

- **Built** modular ASP.NET Core backend and SQL Server data layers across users, identity, devices, manufacturing, commerce, inventory, orders, payments, RMA/repair, releases, NTRIP, device events, and dashboard stats.
- **Designed** MediatR command/query flows, Dapper repositories, role-based authorization, device ownership checks, secure device-event access, and operational admin APIs.
- **Developed** unified dashboard statistics APIs powering KPIs, Action Center, System Health, trend analytics, domain summaries, and daily monitoring in a Next.js admin UI.

LedgerFlow CQRS Backend

Jun 2026

Event-driven order, wallet, audit, and projection backend

ASP.NET Core · C# · CQRS · RabbitMQ · MongoDB · Docker · SQL Server · xUnit

- **Built** a Dockerized ASP.NET Core CQRS backend for order, wallet, and audit workflows using SQL Server transactional writes and MongoDB read models.
- **Published** RabbitMQ integration events for order creation, wallet credits, and payment flows, with a background projection worker for read-side updates.
- **Implemented** REST endpoints, command/query handlers, Swagger/OpenAPI documentation, and xUnit domain tests to demonstrate message-driven .NET service design.

Tender & Vendor Management API

Jun 2025

Procurement workflow and bidding backend

Web API · EF Core · FluentValidation · AutoMapper · xUnit

- **Engineered** REST workflows across **4 core domains**: tenders, bids, vendors, and identity, with lifecycle validation and policy-based authorization.
- **Standardized 5 cross-cutting concerns**: mapping, validation, dependency injection, exception handling, and OpenAPI documentation.
- **Reached 95%+** test coverage and reduced query time by **35%** using xUnit unit and integration testing.

Desktop Diagnostics & Secure Transfer

2024 - 2025

Real-time diagnostics and STM32-Android integration

Qt · C# · WPF / WinForms · Kotlin / Android · Encryption

- **Built** C++/Qt and C# desktop tools for streaming, filtering, visualizing, recording, and analyzing serial data with configurable communication parameters.
- **Implemented** encrypted Bluetooth/Wi-Fi transfer with progress, resume, retry, chunking for files larger than **100 MB**, and **99.5%** recorded transfer success.

EDUCATION

B.Sc. Computer Engineering

K.N. Toosi University of Technology

Sep 2022 - Present

Expected graduation: 2026. Teaching Assistant for core programming courses. Study areas include algorithms, databases, software engineering, operating systems, networks, embedded systems, and OOP.

PROFESSIONAL DEVELOPMENT

Backend Architecture, APIs & Operations Platforms

In progress / project-based

Advanced ASP.NET Core, Clean Architecture, SQL Server tuning, Dapper/MediatR workflows, Docker Compose, Redis, RabbitMQ, MongoDB read models, Next.js admin integration, and scalable backend design.

LANGUAGES & PRACTICES

Persian - Native

English - Professional working proficiency

Technical communication through instruction and documentation; independent work, cross-functional collaboration, production debugging, and code review.
